

**GLASWAL™ - MIRROR PRODUCTS**

API's full line of Mirror Products and accessories assists you in completing an attractive and professional mirror installation. To compliment any design, our J-moldings, angles, corners, and trims are available in a wide variety of sizes, colors, and finishes. Only the most common shapes and sizes are displayed in our catalog, so if you don't see exactly what you need just call us.

Mirror installations requiring support are made easy with our structural J-molding. Simply secure the J-molding to the wall, slip the mirror into the top channel, and then lower the mirror gently into the bottom channel. Adhesive J-molding is available for applications that require a decorative accent but no support.
